Engagement and Communication

Engagement
• How do we prepare our workforce?
• Tools and resources
• Using the NHS Infrastructure

Communication
• Developing 2 way communication
• What does good look like?
• Working together everyone achieves more
• The more I know, The more I understand
Partnership Working

- SPF and STPs
- What does good look like across all provider organisations?
- Navigating the complexities now and as they emerge
- How do we do this together?
Group Work

Engagement

• How can the SPF support the North of England workforce get prepared for change?
• What tools and resources exist to help with this?
• Who is expected to do what to achieve this - what is the role of STP leads, local organisations, regional SPF sub groups?
Group Work

Communication

• How can the SPF support 2--way communication at a local, regional and national level and ensure there is an open and honest dialogue (in the context of strategic, transformational change)

• What would a good communications strategy look to support the above? What are the elements of this?

• Are there any joint communications the SPF would want to develop? (Raising awareness about the existence of the SPF, how it operates, seeking greater and closer engagement and reinforcing the importance of partnership working at all levels during times of organisational change).

• What are the key things the NHS workforce will want to know about during STP changes?

#NSPFsummit
Group Work

Partnership Working

• What does good partnership working look like across STP footprints at both at locality and regional levels?

• What is the role of the SPF in the context of STPs? (Is there a role around scrutiny and assurance - could this be built into STP plans?)

• Working across the NHS and local government is an ambition of STP strategies, will there be implications for the SPF in terms of working across local government? What are those - how do you see this working?
Group Work

Consultation

• What, if any, is the role of the SPF STP decision making?

• How will consultation take place - at what level?

• What will be the remit of the STP partnership arrangements?
Group Work – Feedback (all)

• 30 minutes discussion
• 3-4 minutes feedback from each table
• Tables have questions from the slides to consider – in addition can tables consider the following to feedback:

  - What is the North SPF collective vision and ambition for patients and staff STP changes - agreeing a North SPF Sub Group 'strap-line'
