Commissioning Support Units Key

Facts
Andrew Kenworthy- Director of the CSU Transition Programme
Today…….

‘I will be taking stock of all aspects of CSUs, this will include their accountability, governance, performance, strategic direction and likely changes’
There are 9 CSU alliances (4 years ago there were 95!)

They have a collective income of £808 million

In 2013/2014 CSUs won additional £96m and overall delivered a 5% margin

Their main customers are CCGs (80%) and NHS England (15%)

They employ 10,500 staff

CSUs are partnered with a range of external organisations including the private and third sector
CSUs- Key Facts

Nine CSU groups/alliances have submitted bids in response to the Lead Provider Framework. Seven CSUs are merging which will result in three new organisations. This will enable greater scale and lower cost of service.

CSUs are working with NHS England, the Trust Development Authority and Monitor to offer a waiting list validation service at the 15 Trusts with the most challenging performance levels.

CSUs are working with NHS England to offer independent assessment of Better Care Fund proposals put forward by CCGs.

CSUs are offering to identify the 2% most vulnerable patients in primary care to support the focus upon patients with complex needs as part of the GP contract. All CSUs are able to offer risk stratification and draw upon acute and primary care data.
Midlands and Lancashire CSU have agreed a contract with NHS England to deliver a senior leadership to the national 111 service.

The CSU Transition Team will implement clear standards for specialist service data validation which will be assessed and monitored on a regular basis.

As above, clear data validation standards will be implemented to ensure data from Trusts are effectively and efficiently scrutinised.
